

(a) Event fidelity

Complete event trace

Every event keeps
its summary strip.

low = summary

high = summary

+ archived image

PROMOTE
attach
image

DEMOTE
keep
summary

Cold visual archive

Archive pixels
are reattached.
Never text-generated.

(b) Fixed-B reallocation

Recent-4

B = 4

Promote the latest B events

CausalCache

e3 for e5; still B=4

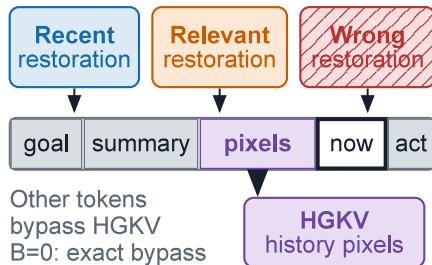

LOCKED INVARIANTS

same goal + complete summaries
same current screen
same resolution + B active images
only promoted events change

Promote e3 only if $\Delta_t(e3 | S)$
> utility of displaced e5
k is realized, not preset
B is not archival capacity

(c) Learning & deployment

Training: matched B;
only restoration identity changes

Deployment

CausalCache-P

P: proposal-conditioned default

CausalCache-LA

LA: efficiency branch, not default
