

(a) Cross-app trace

All summaries remain present.

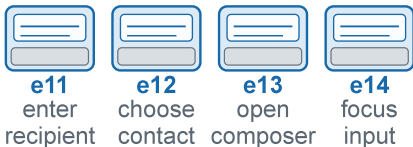

e7 pixels show:
white T-shirt
skincare set
task order ID

Summary stays active;
the screenshot stays archived.

(b) Recent-4 fails

FAIL

Active history images (B=4)

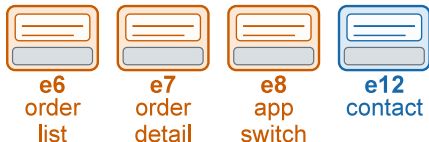

e7 summary remains.
Its task-relevant pixels are
outside the active recent window.

Actual eventual message:
"Women's Cotton Short Sleeve
T-shirt, 202306010001"
Wrong item/order -> failure

(c) CausalCache-P

PASS

Step 15 reallocation (B=4):
[11,12,13,14] -> [6,7,8,12]

realized k = 3

Actual typed message (translated):
"Classic white T-shirt,
moisturizing set,
639281475036294"
Correct item/order -> success

Pass 1 -> pass 2 keeps the goal, all summaries, current screen, and B=4;
only which summarized events receive archived pixels changes.
